

File Transfer Protocol Meaning In Marathi

Select Download Format:

File Transfer Protocol (FTP) is a standard network protocol used for the transfer of computer files between a local device and a remote server over a network connection. It is commonly used for web hosting and file sharing. The protocol operates on a client-server architecture, where the client initiates the transfer and the server responds. FTP is often used to upload and download files from a web server. It is a simple and efficient way to manage files on a remote server.
